

What happened to Cuba's power grid?

MEXICO CITY - Cuba's power grid shut down on Friday, leaving the entire country without electricity. The massive outage leaves 10 million people on the Caribbean island without electricity. One of the country's largest power plants, the Antonio Guiteras power plant in the western province of Matanzas, failed shortly before midday on Friday.

When will Cuba's power grid be operational again?

Cuban officials have not indicated a timeline for when the power grid will be operational again. The massive blackout is a new low in a country that has already been dealing with a deepening economic crisis, compounded by the US embargo and widespread food shortages. Reminder: It takes all of us.

What happened to Cuba's power plant?

The situation came to a head on Friday, when Cuba's largest power plant malfunctioned, joining several smaller plants already offline. Foul weather had also stalled the arrival of fuel from tanker ships offshore, starving the island's power plants. The combination prompted the entire grid to collapse.

Why is Cuba in a blackout?

Cuba's electrical grid shut down on Friday, putting the country into a blackout after the failure of one of the island's major power plants, according to its energy ministry.
