MEXICO CITY - Cuba's power grid shut down on Friday,leaving the entire country without electricity. The massive outage leaves 10 million peopleon the Caribbean island without electricity.

Is Cuba generating enough electricity?

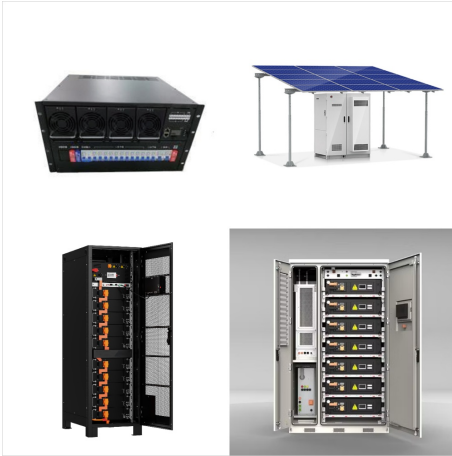

Cuba said it was generating only enough electricity to cover about one-sixth of peak demandlate on Wednesday,hours after its national grid collapsed leaving millions without power.

When will Cuba's power grid be operational again?

Cuban officials have not indicated a timeline for when the power grid will be operational again. The massive blackout is a new low in a country that has already been dealing with a deepening economic crisis, compounded by the US embargo and widespread food shortages. Reminder: It takes all of us.

Does the US have a role in Cuba's grid collapse?

The United States denies any rolein the recent grid collapse. U.S. sanctions,however,do complicate financing of fuel purchases and spare parts for Cuba. They also scare off many oil tankers,forcing Cuba and Venezuela to depend on their own obsolete fleet for transportation. But Cuba's government has also acknowledged its own shortfalls.

Reuters. Cars drive on Havana's seafront boulevard Malecon as the country's electrical grid collapsed again on Sunday, according to Cuba's energy and mines ministry, in the latest setback to the

While the collapse of the electrical grid comes as a surprise, the crisis is years in the making. Cuba's power plants are dilapidated and in desperate need of maintenance. In addition, Cuba produces very little fuel of its own, meaning it relies on imports to keep the electrical grid afloat.

Last month, Cuba experienced significant power blackouts, plunging the island into darkness. The blackouts resulted from ongoing issues with the country's aging and underfunded power grid, compounded by natural disasters and economic hardships. Tropical storm and hurricane activity in the Caribbean exacerbated power disruptions, further straining the fragile infrastructure.
