

What are solarplay portable power stations?

SolarPlay portable power stations are high-performance products, developed by our dedicated production plant and scientific researchers. SolarPlay has reliable products for outdoor adventures and backup power.

Who is solarplay?

Welcome to SolarPlay! SolarPlay is a pioneering brand dedicated to providing efficient and portable power solutions for modern adventurers, travelers, and emergency responders. Our focus is on delivering reliable, high-performance portable power stations that ensure you stay connected and powered up, no matter where you are.

Can the solarplay power station be charged with a third-party solar panel?

A: The SolarPlay power station can be charged with a third-party brand solar panel. You must match the plug size and input voltage of the SolarPlay power station you want to charge. For example, the third-party solar panel for the SolarPlay Q2501 should have the following specifications:

How much power does the solarplay portable power supply have?

[Adjustable input power and convenient to carry] The Solarplay portable power supply offers five adjustable input power levels: 300W, 500W, 700W, 900W, and 1100W. It can be charged according to the usage environment and charging needs, ensuring optimal performance.

Does solarplay work with a generator?

SolarPlay power station is compatible with AC adapters and solar panels (11.5V to 48V, max. 500W), car cigarette sockets (12V/24V), and generators. We recommend using the Solarplay solar panel 200W with it. The built-in battery uses a lithium iron phosphate battery (LiFePO<sub>4</sub>) that lasts 15 years with over 3500 charge/discharge cycles.

How many USB ports does a solarplay solar panel have?

It can be used with the Solarplay solar panel 200W. This device can charge and supply 14 devices simultaneously. It features four AC ports, two USB-A (QC3.0) ports, three USB-C (PD 20W) ports, one USB-C (PD 100W) port, one cigarette lighter port, two DC5521 ports, and one XT60 port.
