A solar power generator is a pre-wired power solution with a battery bank, inverters, a battery charger, and solar panels. In simple words, it is a combination of two products: a power station and a solar panel that transforms sunlight captured by solar panels into electrical power, which is then stored in an internal storage system for future use.

Shaping A Sustainable Future. Li-Cube is more than just an off-grid solar solution; it's a step toward a sustainable future. By blending cutting-edge technology with top-tier quality products and a strong focus on the environment, we're not just delivering solutions???we're driving a vision of a world powered by renewable energy.

Design My System is an online tool that lets you create your own solar energy system in minutes. You can choose your system size, battery capacity, inverter type, and other components based on your location, roof size, energy consumption, and budget. You can also see the estimated cost, savings, payback period, and environmental impact of your system.
