

How far can A Cuddeback camera cover?

Cuddeback claims that its CuddeLink cameras range from .188 mile to 1 mile per link, depending on the terrain, so you can cover several miles with multiple cams. I recently tested the system by way of four CuddeLink cameras, and here's what I found. First, the concept is genius.

Do Cuddeback trail CAMS use a lot of battery?

Because they must transmit and receive data, however, they do use more battery power than most newer trail cams; the "Home" units use 4 D Cell batteries, while the small "repeater" units use 9 AA batteries. This is just a fact of life, but Cuddeback is set to offer a solar panel soon.

Are cuddelink cameras worth it?

The CuddeLink system only needs 1 plan for all of your cameras. That is because the "remote" cameras all send pictures to 1 "home" camera which sends the pictures to your email, and that is the only cellular plan you need to pay for. Check their plans out online, they are definitely worth it. Our first night picture after I updated our firmware!

What is Cuddeback trail cam system?

Cuddeback hopes to remedy all these problems with its revolutionary CuddeLink trail cam system, wherein up to 15 CuddeLink cams per "Home" unit can be placed across your property to form a wireless daisy chain. All images taken by each cam are automatically sent to a designated "Home" unit, so you only have to check that unit.

Does cuddelink need a cellular plan?

Unlike other cell camera systems where you need 1 plan for each camera. The CuddeLink system only needs 1 plan for all of your cameras. That is because the "remote" cameras all send pictures to 1 "home" camera which sends the pictures to your email, and that is the only cellular plan you need to pay for.

CUDDEBACK SOLAR PANEL REVIEW

Keep your Cuddeback camera running indefinitely with a Cuddeback Solar Power Bank. Features poly crystalline solar panel that charges batteries in sun or shade. Uses NiMH batteries that perform in sub-freezing temperatures. In the event the solar batteries are depleted the camera will continue to operate from the camera's internal batteries.

Cuddeback Cuddelink reviews. I've got the j cameras work great battery life is not to good, but i just went to solar panel on the one's on plots and battery pack on the one's in the timber now no worry on battery going dead only have had couple problem's with two camera's one had to send in the other was taken care of on the phone. Now i

CUDDEBACK SOLAR PANEL REVIEW

Top reviews from other countries James T. 5.0 out of 5 stars Great Product. Reviewed in the United States on 4 August 2021. Verified Purchase. I was skeptical when purchasing this solar panel for my daisy chain Cuddeback J series camera system. I currently have seven cameras out in the field on about 100 acres of River-birch and cottonwoods

To test a Cuddeback camera, place the SD card in a viewing device such as a viewer or PC to see if images can be viewed. If no image can be seen, visit the Cuddeback website for advanced testing methods. As a preliminary check, place a quarter over the camera lens and ensure the SD card is in place.
