

Who is Cummins Power Generation?

Cummins Power Generation is a world leader in the design and manufacture of power generation equipment, including PowerCommand standby and prime power systems.

What is Cummins Power System?

In applications including mining, rail, oil and gas to data centers, healthcare, water/wastewater, telecom, commercial, rental, and microgrid systems, Cummins Power System technologies are the backbone of the industries that keep our world running.

What makes Cummins proud?

That history makes us proud, but the future pulls us forward. Cummins Inc., a global power solutions leader, comprises five business segments - Components, Engine, Distribution, Power Systems and Accelerate by Cummins - supported by our global manufacturing and extensive service and support network, skilled workforce and vast technological expertise.

Why is Cummins a reliable power system?

Cummins delivers reliable power systems used in critical applications globally. Whether for data centers, on rugged job sites such as oil and gas fields, or as backup power for our homes, Cummins technologies are trusted around the corner and around the world.

Who makes Cummins integrated power systems?

Every component of Cummins Integrated Power Systems has been completely designed and built by Cummins and has been factory tested to ensure the highest reliability in the industry.

How many Cummins dealers are there?

More than 500 Cummins-owned distributor facilities and 8,000 dealer locations spread across over 190 countries and territories means Cummins is ready to support you on any job where reliable power is critical, anywhere in the world.
