We offer full end-to-end solar solutions and complete project management from start to finish. Our services include free site analysis, engineering and design services, financing, rebate application, installation, permitting, inspections, ???

When the batteries reach full capacity, any surplus solar energy can be but does have to be supplied back to the local energy provider, with compensation at a rate of ANG 0.25 per kWh. In instances where there is insufficient solar energy, the system seamlessly draws additional power from the local energy provider to meet the energy needs

When the battery power is insufficient, the city grid power or generator can be used to charge the battery. This process is automatically controlled by the off grid solar panel kits for sale. We produce residential solar system solution, industrial solar system solution and commercial solar system solution.
