Module description ** It may take 2-10 seconds for the website to load after you hit Generate. Sorry for the inconvenience. This is the tool to create planets and solar systems for role playing games set in Science Fiction. It is designed to help masters of games like Traveller, Starfinder, Stars Without Number, Ultramodern5, Eclipse Phase, Dune Adventures, Star Trek ???

We play on roll20, and when the party is flying around in system, I find it helpful to display a map of the solar system, with tokens for various points of interest - other starships, space stations, etc. I struggled to find a suitable map. Eventually I ???

A Custom Game is a template[1] with which medium to experienced players create a new game world. What makes Custom Games challenging is that these sandbox maps have no guidance and "throw you into the deep end". Alternatively, you could also create a new game from a Scenario, which is recommended for beginners. On the main screen, click New Game. Go to ???

Welcome to your solar system generator! Start a new solar system. Name your solar system: Name your star: Choose your star's spectral type: This project uses the Morgan???Keenan system of star classification. Read more about the Morgan???Keenan system here. How many planets would you like?

This is the main planet tag, which describes the planetary body. Other possible body types are described by changing the name of the tag: Planet - normal planet DwarfPlanet - dwarf planet Moon - normal moon DwarfMoon - dwarf moon (minor irregular-shaped moons) Asteroid - asteroid Comet - comet Star - star (sun) Barycenter - barycenter of binary stars or binary planets

CUSTOM SOLAR SYSTEM MAP

SOLAR®

To create your solar system, use the "Add" button at the top to add new planets. Change the characteristics of each planet by using the buttons below the solar system model. You can select color, size, speed, orbit tilt, and whether the planet has rings or not. You can add moons to the planets by selecting the planet and clicking "Center

I am going to visit every planet and moon in the solar system. This rocket can do that . Attachments. Screenshot_2018-09-13-21-26-59.png. 261.3 KB Views: 1,250. ArelGG Mapper. Sep 13, 2018 #21. A: A custom system is a .wssg (csv) file containing the system(s)'' information. Each planet is a row with all of the planet's data, there is a guide as to how to read the data at the readme . Just modify the file using your favorite spreadsheet editor, save it as csv, and you can load your custom system!

Upload your own custom surface textures by clicking "setCustomTexture" View Controls: PlanetMaker uses mouse and keyboard based navigation controls, similar to those in Google Earth. Rotating: Rotate the scene by left-clicking ???

An orrery is a model of the solar system that shows the positions of the planets along their orbits around the Sun. The chart above shows the Sun at the centre, surrounded by the solar system's innermost planets. Click and drag the chart to rotate the viewing angle, or use your mouse wheel to zoom in and out.
