

A solar PV inspection is a process that leverages several possible techniques to evaluate the current state of every solar photovoltaic (PV) panel. Other types of inspections have a different scope and may focus on inverters or batteries, but a solar PV inspection is specifically concerned with the state of the panels.

The average cost to install solar panels is around \$26,600, and most homeowners pay between \$4,500 and \$53,000. Keep in mind that these prices don't consider the federal investment tax credit (ITC), which can effectively reduce those costs by up to 30%.
