

Why has the Danish Energy Agency not received bids?

The Danish Energy Agency has not received bids for any of the three offshore wind farms in the North Sea put out to tender. The Minister for Climate, Energy, and Utilities has asked The Danish Energy Agency to engage in dialogue with the market to identify why no bids have been submitted. 13. November 2024

What is the Danish Energy Agency's global cooperation?

The Danish Energy Agency's Global Cooperation partner with other countries and share the Danish experiences on shaping an energy system that combines a green, low-carbon and reliable energy supply with economic growth. Geographically the energy partnerships cover 24 countries around the world.

What percentage of Denmark's energy supply is oil?

In 2022, oil represented 37% of Denmark's Total Energy Supply (TES), in line with the International Energy Agency (IEA) average of 35%. Its stable share over the past decade saw a slight decrease in Total Final Energy Consumption (TFEC) from 45% in 2011 to 38% in 2021, primarily due to shifts in the transport sector.

Why did Denmark rethink its energy policy?

The 1973 oil crisis forced Denmark to rethink its energy policy; in 1978 coal contributed 18%, and the first wind turbine was built, along with the creation of a wind turbine industry. The 1979 energy crisis pushed further change, and in 1984 the North Sea natural gas projects began.

How many countries do Denmark's energy partnerships cover?

Geographically the energy partnerships cover 24 countries around the world. The Danish policies on climate change mitigation is driven partly by compliance with international climate obligations, and partly by achieving national targets in the energy sector. Read Denmark's National Energy and Climate Plan (NECP) for the period 2020-2030.

Does Denmark use nuclear power?

The production of nuclear energy has been banned in Denmark since 1985. In 2014 and 2015, (imported) nuclear power was 3-4% of electricity consumption in Denmark. An average of 10% of domestic energy consumption comes from imports from neighboring countries Sweden and Germany, which both generate nuclear power.
