

Whether the family situation changes, perhaps with the purchase of an electric car, which needs charging daily, or with a swimming pool in the garden for pleasure???with the Sunny Boy Storage, storage systems and PV systems can always be designed ???

? 1/4 ?Sunny Boy Storage???,???????

Sunny Boy Storage is the battery inverter designed for new high voltage batteries from leading manufacturers. With a charge and discharge power of 2.5 kW, it is ideally suited to handle the electricity demand of a private household.

Sunny Boy Storage is the battery inverter designed for new high voltage batteries from leading manufacturers. With a charge and discharge power of 2.5 kW, it is ideally suited to handle the electricity demand of a private household.

The Sunny Boy Storage is the battery inverter for high-voltage batteries from all reputable manufacturers. With a charge and discharge power of 2.5 kW, it is ideally suited to coping with the electricity demand of a private household.

An important characteristic of the Sunny Boys is that they feature the international SMA grid guard interface. This ensures maximum reliability when operating the solar power system, and enables electricity to be fed into public grids ???

An important characteristic of the Sunny Boys is that they feature the international SMA grid guard interface. This ensures maximum reliability when operating the solar power system, and enables electricity to be fed into public grids anywhere in the world.

With the Sunny Boy Storage, customers benefit from markedly reduced system and installation costs and flexible applications. Thanks to AC coupling, the battery inverter can be installed or expanded in any location, at any time, regardless of whether or not there is ???

The Sunny Boy Storage is the battery inverter for high-voltage batteries from important reputable manufacturers. With a charge and discharge power of 2.5 kW, it is ideally suited to handle electricity demand of a private household.
