Auxiliary engines provide power to the electrical devices of the ship, while propulsion engines provide the power to move the vessel. It is essential to know how much horsepower your ship and its load will require when assessing your needs. The power-to-weight ratio is key, and even a 50 HP difference between engines could be very noticeable.

DEPCO POWER SYSTEMS PRODUCT AND EQUIPMENT

Depco Power Systems was founded in 1991 to deliver integrity and value to the power industry. Selling new, rebuilt, and used diesel generators, natural gas generators, diesel engines, natural gas engines, marine engines, marine transmissions, power units, transfer switches, and parts provide clients in over 100 countries.

For instance, it can power the lights and other electronic equipment in the house or office. However, you should not use it to power the main facilities, such as elevators, air ventilation, heating or cooling systems. All these systems won't run smoothly on a single-phase generator since it won't offer high output.

Discover the importance of industrial generator tier ratings and how they impact EPA emissions compliance with Depco Power Systems. Sales: 800.723.3726 | +1 and Particulate Matter.
