Offshore construction projects and other challenging marine jobs require innovative solutions with reliable power supplies. When UK-based marine drilling contractor, Fugro Seacore and the Netherlands based marine dredging and engineering contractor, Van Oord/Wicks came together to create a unique jack-up barge for a tough job, they chose the Caterpillar C9 ???

When speaking about the famous Caterpillar C27 Generator Sets, the expectation is that the technical aspects and features of the product will receive all the attention. However, it is sometimes better to see what the C27 does and is doing. Those employing it in their business say by action what their words really mean. Deployed to some of the most important construction ???

At Depco Power Systems, we specialize in providing top-quality generator sets for sale to meet the diverse power needs of our clients. From reliable diesel generator sets to efficient natural gas generator sets, we offer a range of new and low-hour used units from trusted brands like Caterpillar generator sets and Cummins generator sets.

Depco Power Systems purchases used and surplus commercial generators, industrial and marine diesel engines, marine gears and power equipment from around the world. We provide our sellers with a great experience and fair market value at the same time.

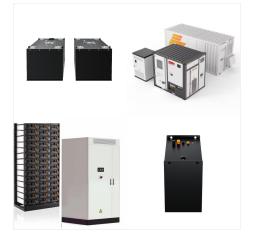

As winter storms continue to strain power grids across the country each year, grid reliability is becoming increasingly important. Massive power grid failures, such as the 2021 grid failure in Texas, are highlighting serious problems in centralized grid structures. As a result, many organizations and communities that need reliable power in the face of uncertain conditions are ???

They bring years of experience buying and selling major industrial brands, all over the world. So when you need to find the right piece of equipment for your specific application the Depco sales team can help.

Generators for the Mining Industry: Dig Deep, Dig Safely Including oil and gas production, mining in the United States is a traditionally robust industry. From generating \$216 billion in 2000 to a high of \$683 billion in 2015, in 2016 it produced \$359 billion. Much as with the agriculture industry, advancements in technology have allowed for these increases without necessitating a ???
