

Is the Democratic Republic of the Congo an energy exporter?

One of the Inga dams, a major source of hydroelectricity in the Democratic Republic of the Congo. The Democratic Republic of the Congo was a net energy exporter in 2008. Most energy was consumed domestically in 2008. According to the IEA statistics the energy export was in 2008 small and less than from the Republic of Congo.

How much power does the Democratic Republic of the Congo have?

The Democratic Republic of the Congo has reserves of petroleum, natural gas, coal, and a potential hydroelectric power generating capacity of around 100,000 MW. The Inga Dam on the Congo River has the potential capacity to generate 40,000 to 45,000 MW of electric power, sufficient to supply the electricity needs of the whole Southern Africa region.

How much electricity does the DR Congo import?

The DR Congo imported 78 million kWh of electricity in 2007. The DR Congo is also an exporter of electric power. In 2003, electric power exports came to 1.3 TWh, with power transmitted to the Republic of Congo and its capital, Brazzaville, as well as to Zambia and South Africa.

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

What is the Congo Energy Atlas?

This Atlas was created by the UNDP, Netherlands Development Organization SNV, and the Congolese Ministry of Water Resources and Electricity. It has 600 interactive maps and informs policymaking on decentralizing energy and encourages further renewable energy investments.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power

their facilities.
