

What is the EG4 18kpv hybrid inverter?

Introducing the EG4 18kPV All-In-One Hybrid Inverter - the ultimate power solution for any solar project! This innovative hybrid inverter combines the functionality of a grid-tied and off-grid system together while eliminating the need for charge controllers or transformers to create a convenient, independent, all-purpose powerhouse.

What does EG4 18kpv display?

Displays live energy data, battery charge and discharge limitations, and battery warning or fault. ***If you've purchased an EG4 18kPV Inverter through Signature Solar, be sure to use the customer code 'Signature' when setting up the monitoring system!

Is the EG4 18kpv ETL & CETL certified?

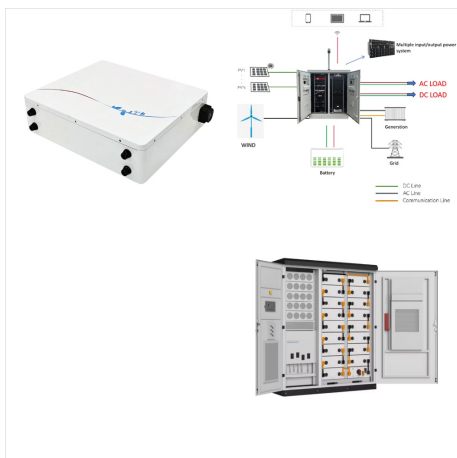

The EG4 18kPV is ETL & cETL certified and complies with national and international standards for safety and reliability when connected to the grid. Fully Remote monitoring & firmware upgrades Displays live energy data, battery charge and discharge limitations, and battery warning or fault.

How long does it take to setup EG4 PowerPro?

I ordered this along with two of the EG4 PowerPro outdoor batteries and a pallet of 400watt bifacial panels (14,400 watts). Got it setup very quickly. Called Signature and talked to tech support to get it setup to my specs. This only took about 30 minutes for the entire phone call and setup. Has been running for 5 days now and no issues.

1 ? I'm new here, and this is how I plan to use my EG4 18kpV hybrid inverter. The order of operations will be: use PV directly, then Battery, then Grid. Is it possible to configure the inverter to switch to grid once my battery bank capacity reaches 60%? Is there a feature like controlling when to switch to the grid when the battery capacity
