

Up to 4 bus boards can be connected to one PSU3. The PSU3 delivers significantly more power than the previous PSU2, so even power-intensive modules such as those from AIRA/Roland can be powered without any problems. ATTENTION: Suitable for qualified personnel only because of electrical safety (dangerous mains voltage 100V - 240V)

V; 2 Built-in A-100PSU3: +12 V / 4000 mA, -12 V / 2400 mA, +5 V / 8000 mA; 6 Doepfer A-100 V6 Bus Boards with slots for up to 132 modules; Usable depth for modules: 70 mm in the area of the power supply unit, otherwise 100 mm; External dimensions with lid (W x H x D): approx. 90 x 48 x 23 cm (18 cm without lid) Weight incl. lid

An assembled and tested power supply 12V / 2000mA, -12V / 1200mA, +5V/4000mA, mains voltage with a wide range of input 100-240V. Up to four bus boards can be connected to the A-100 PSU3. Primarily intended for use with the Doepfer A-100 bus boards but can be used with many other passive bus boards.

Eurorack Case and Power Supply a?? Just Add Modules. Your Eurorack synthesizer modules deserve a robust chassis with a reliable power supply, and that's exactly what you get with the Doepfer A-100LC3. This raw-wood case features one row with 84HP useable width, one bus board, and a power supply (1200mA, no +5V).

The Doepfer A-100 is an analog modular
synthesizer system introduced by German audio
manufacturer Doepfer in 1995. and a variety of
cases are available to house them. This type of
racking system, Eurorack, has been adopted by
many other manufacturers of synthesiser modules.

Power Supply. For each circuit, a power supply is required. The three symbols to the left side denote +12V, -12V and GND. Some circuits may require no power supply (e.g. multiples or the simple attenuator below) or only a positive supply. All circuits that use operational amplifiers require all three +12V, GND and -12V.

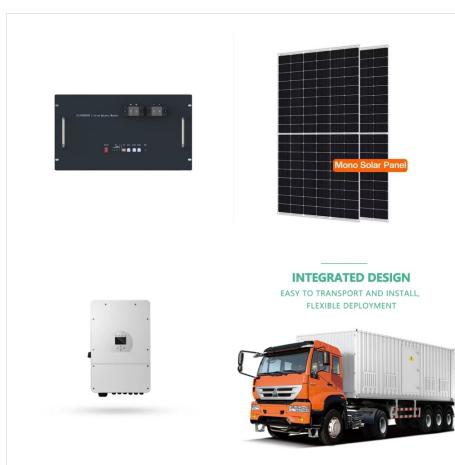

A-100 Analog Modular System - Housings
Overview: 19" Rack Version 84 HP : Flightcase
Versions 84 HP: It has a removable top cover with handle for easy transportation. Two A-100 power supplies and four bus boards are built in. Please ask the Doefer representative in your country for availability of transformers with 115V mains voltage.

The power supply used here is a switching power supply which can be used in the entire world as it accepts mains voltages from 100V to 240V. The PSU supplies you with 380mA at +12V and 380mA at -12V.
