Severe weather events and grid disruptions can often cause power outages. As we hear about extreme weather events with increasing frequency (WMO 2021, CARB 2021, CDC 2021), more households are turning to generators as a back-up source of power. A portable generator (Figure 1) can help individual households span power outages by producing enough electricity to run ???

**Backup Battery Systems**  
We offer 2 major backup battery options - SunPower and Generac. The batteries can be charged using Solar or the Utility. However, most are not eligible for net metering if you use the utility power. Utilities do not allow electricity arbitrage (not typically an issue in WA, but principle

Surprisingly, most stores don't have backup power or generators. Selling groceries is a low-profit margin business, and backup generators are very costly to purchase initially and to maintain. Luckily, power outages are relatively rare. And when they do happen, it is for short amounts of time. If the time is short enough, they don't have to
