

What is a hybrid solar-wind energy system?

By taking this hybrid approach, you gain an energy system that's considerably more reliable than the US electric grid. The charge controller within a hybrid solar-wind energy system provides a properly managed and consistent energy flow which isn't always possible with traditional energy sources.

What is a hybrid wind-solar energy system?

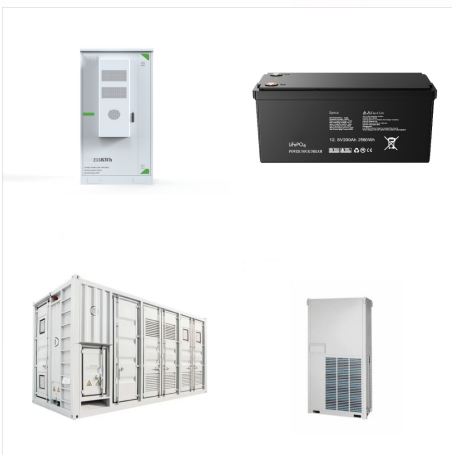

A hybrid wind-solar energy system consists of the following components: These hybrid systems operate off-grid, so you can't rely on an electricity distribution system in an emergency. A bank of batteries provides backup power for those wind-still, overcast days, or you can incorporate an existing emergency generator into the system.

Does Blue Pacific Solar offer a hybrid energy system?

Blue Pacific Solar has a range of stand-alone hybrid energy systems available, each of which includes a standard Primus wind generator with a built-in charge controller, a pre-built power center, and a varying number of 300W solar panels.

What is a charge controller in a hybrid solar-wind energy system?

The charge controller within a hybrid solar-wind energy system provides a properly managed and consistent energy flow which isn't always possible with traditional energy sources. Renewable energy systems are easy and cheap to maintain.
