

How does Dropbox backup work?

The backup process creates a copy of your files in Dropbox Backup but leaves them on your computer or external hard drive as well. If you delete the files from your computer or Dropbox account, they'll also be deleted from the other location. Files backed up from your external hard drive can only be deleted directly from the external hard drive.

Which Dropbox plans are backed up?

Plans like Dropbox Basic, Plus, Family, Professional, Standard, Advanced, and Enterprise provide cloud storage for your personal and business needs. What is backed up? You can select which folders are backed up from your computer or external hard drive during setup. To see a complete list of files that are backed up in your Dropbox account:
