

Who is drygair?

Since its establishment, DryGair has turned an innovative growing concept for treating greenhouse humidity into an internationally recognized agricultural technology company, with presence in major markets in Europe, North America, and the rest of the world.

Does drygair have a heating and cooling system?

DryGair units can be equipped with a heating and cooling system to provide additional temperature control functions. Controlling humidity and temperature together provides complete and efficient control over climate conditions. DryGair is designed for maximum energy efficiency.

What is drygair a new way to grow?

DryGair provides a powerful tool for climate control, giving growers much more than just humidity reduction. DryGair's new greenhouse growing concept 'A New Way to Grow' provides an innovative and holistic approach to cultivation.

How does drygair work?

DryGair's patented air circulation module and powerful fans spread the treated air in all directions, 360°, to ensure homogenous, optimal climate conditions throughout your growing facility. DryGair units can be equipped with a heating and cooling system to provide additional temperature control functions.

Why should you choose drygair?

Please contact us for consultation and get a professional recommendation tailored to your space. installs 18 new DryGair units as part of their commitment to sustainability and reducing their environmental footprint. Besides improving plant quality and preventing diseases, DryGair also helps save significant amounts of energy.

DryGair Energies Ltd. DryGair diseña, desarrolla y comercializa una solución de deshumidificación eficaz y respetuosa con el medio ambiente para la horticultura comercial. Nuestros deshumidificadores están diseñados para invernaderos y viveros, cuartos de cultivo, secaderos, cultivos hidropónicos y granjas verticales.

DryGair Energies Ltd. DryGair designs, develops and markets an efficient and environmentally friendly dehumidification solution for commercial horticulture. Our dehumidifiers are designed for greenhouses and nurseries, grow rooms, drying rooms, hydroponics and vertical farms. DG dehumidifiers are compatible with all crops, including vegetables

DryGair Energies Ltd. DryGair conçoit, développe et commercialise une solution de déshumidification efficace et respectueuse de l'environnement pour l'horticulture commerciale. Nos déshumidificateurs sont conçus pour les serres et les pépinières, les salles de culture, les salles de stockage, les cultures hydroponiques et les fermes
