

How tall is Athens Towers?

Athens Towers (Greek: Pyrgos Athinon), is a complex of two buildings situated in Athens, Greece. Athens Tower 1 is 103 m (338 ft) and 28 storeys high, making it the tallest building in Greece, while Athens Tower 2 has 15 storeys and a height of 65 m (213 ft) being the 8th tallest in Greece.

What is the tallest building in Greece?

The Tower of Athens is less than 100 meters high without the antenna masts, has 28 floors and is still the tallest building in Greece. The architecture of the tower is minimalist and futuristic and is an imitation of other buildings in Europe and America, like the Seagram Building.

What is a Dyness tower Pro Series?

Dyness Tower Pro Series with IP55 protection level offers multiple energy options through an expandable modular design (2-6 modules combined), and the expandable parallel connection of up to 12 clusters allows for a maximum capacity of 276.48 kWh. The stackable auto-configuration modules make the system easier to install and maintain.

Who designed the Tower of Athens?

The architect of Athens Tower is Ioannis Vikelas, who also designed the main building of the Goulandris Museum of Cycladic Art. Its architects were Ioannis Vikelas and Ioannis Kympritis. Despite the criticism it has received due to its design and high height, the Tower of Athens is today considered to be one of the landmarks of Athens.

What is the architecture of the Athens Tower?

The architecture of the tower is minimalist and futuristic and is an imitation of other buildings in Europe and America, like the Seagram Building. Typical is the use of glass curtains on the exterior walls of the building with aluminum frame. The use of glass curtains has since become commonplace for large commercial buildings in Athens.

How high can a building be in Athens?

Specifically up until 1968 the maximum allowed height of a building was 35 meters, but from 1985 until now it is 27 meters. There are several exceptions though, such as the Athens Towers, the Atrina center, and the OTE central building, all of which exceed that level.

Apollo Tower, located in Ampelokipoi, Athens, is Greece's tallest residential building, rising 80 meters with 25 floors. Completed in 1973 during the Greek Military Junta era, the tower's ???
