

This time I got two "warning" messages "Chassis control system fault" then "e-pedal system failure" when trying to turn-on e-pedal. Both are yellow warnings. Nissan said car safe to drive (hmmm). by which I mean that it seemed too easy to turn the car as if the power steering (Chassis control?) was aiding me too much (NOT the same as the

This warning appears if there is a malfunction in the e-POWER system and the power provided to the electric motor is reduced. The displayed message will vary depending on the condition of the system malfunction.

press the honk or turn on the light to let the residual power get used up completely; connect the battery ??? first comes the positive terminal, then the negative; They have proper diagnostics equipment and can clearly find the culprit of any system fault using Nissan's original scanners and software. But after you get the diagnosis, you
