

How many Solomon Islanders will benefit from solar energy?

WASHINGTON D.C., July 5, 2018 - More than 9,300 Solomon Islanders will benefit from new or improved electricity services, including renewable energy sources such as solar, through a new project approved today by the World Bank's Board of Executive Directors.

What is the Solomon Islands energy project?

The project will support the Solomon Islands government to boost renewable energy generation and increase access to grid-supplied electricity, while reducing reliance on expensive, imported fossil fuels.

Why is access to energy important in the Solomon Islands?

"Access to energy is very important to increase the quality of life of Solomon Islanders and for the development of businesses," said Bradley Tovosia, Solomon Islands' Minister of Mines, Energy and Rural Electrification.

Why is the SPIRES project a beacon of hope for the Solomon Islands?

The success of the SPIRES project stands as a beacon of hope for the Solomon Islands. As UNDP Programme Manager Ms. Vini Talai summarized, "Villagers will now be able to use electricity to stimulate economic growth in their communities through increasing production of goods by switching from using manual tools to electric equipment."

How can Solomon power improve workplace culture?

Additionally, in collaboration with IFC, the International Finance Corporation, the project will support Solomon Power to build a productive and respectful workplace culture by strengthening anti-bullying and harassment policies, and supporting employees who may be affected by domestic violence.

The Asian Development Bank (ADB) has partnered with the Solomon Islands and Tonga to support their energy transitions, with solar power playing a central role. Agreements were finalised during COP29 in Azerbaijan, focusing on renewable energy projects in ???

Honiara, the capital city of Solomon Islands, is situated in a tropical location that offers consistently favorable conditions for solar energy generation throughout the year. Located at latitude -9.4277 and longitude 159.9494, this equatorial setting experiences minimal seasonal variations in daylight hours, making it an attractive site for solar photovoltaic (PV) installations.

A very sunny day in October, the Rokera Provincial Secondary School in East Are"are, Southern Malaita, witnessed a transformative event. The inauguration of a 36kWp solar hybrid photovoltaic (PV) power system marked the first step towards releasing the ???
