Yes Victron is more expensive and can be a little better designed but requires installing more components and I don't find it simple either.

How much power does a easun MPPT need?

This Easun MPPT just seems to like a higher input voltage. It does say in the specs that minimum input is 30vDC. With this new arrangement I observed 470w at peak solar time. Whereas with the initial array voltage setup I maxed out at 400w.

How much power does the easun consume?

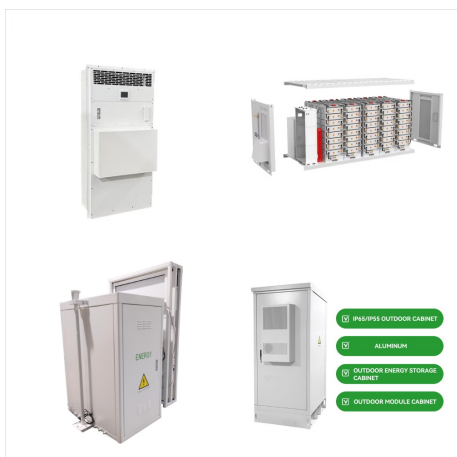

The EAsun itself consumes 50w to 100w from what I can figure. Misc LED lights that get switched on briefly during daytime. Plus alarm clock and security camera video recorder. Probably not more than 30w.
