

EC POWER ? stata fondata nel 1996 in Danimarca - un paese pioniere nella transizione energetica e specialmente nella cogenerazione di energia elettrica e calore.. Non c" da meravigliarsi che la nostra azienda si distingua per il suo spirito pionieristico e la sua speciale forza innovativa, che si riflette in oltre 25 brevetti.

And let's make it short - EC POWER has the best eta-s value (??s) in its industry sector with the XRGI(R). Remote power: Only with high losses. The classic power plant, which supplies electricity from the greenfield, has a decisive disadvantage: It utilises only approx. 40 % of the energy included in its fuel. The remaining 60 % gets lost as

Equatorial Guinea's large and growing youth population ??? about 60% are under the age of 25 ??? is particularly affected because job creation in the non-oil sectors is limited, and young people often do not have the skills needed in the labor market. Teodoro OBIANG Nguema Mbasogo (since 3 August 1979 when he seized power in a military

Equatorial Guinea is the lone Spanish-speaking nation on the African continent. This distinction sets it apart from its neighboring countries. Equatorial Guinea has a relatively small population. With a population of around 1.4 million, Equatorial Guinea is one of Africa's least densely populated countries.

The combustion engine of the Power Unit ??? of the actual cogeneration plant ??? has been especially developed for EC POWER by Toyota, has an extremely long life, and is silent and reliable. The brain of the plant is the iQ control panel. This controls the Power Unit depending on its demand, and optimises its operation fully automatically.
