Meanwhile, lithium-ion batteries are more than 95% efficient. In other words, using the same example, there will be over 950 watts of power available with lithium-ion batteries. And in addition to better storage for solar power, higher efficiency also comes with a faster rate of charge for lithium-ion batteries.

GSL Energy today announced that it has successfully completed their 16Kva 20Kwh smart hybrid on/off grid solar lithium battery storage system in Ecuador. This project will be used to support the power supply system for hotels.
