

A solar inverter is really a converter, though the rules of physics say otherwise. A solar power inverter converts or inverts the direct current (DC) energy produced by a solar panel into Alternate Current (AC.) Most homes use AC rather than DC energy. DC energy is not safe to use in homes. If you run Direct Current (DC) directly to the house

Is your solar inverter tripping throughout the day and you have no idea why? We have been asked this question a lot lately from our customers. The good news is it isn't the inverter that is causing the issue. It's high grid voltage and it's becoming an ongoing problem not just in Victoria, but across Australia.

eko solar inverters. These are re-badged Solis inverters, and are installed by AGL, and come with an 8 year warranty. Contact AGL if you are having issues with this inverter. enphase micro inverters. Enphase are an American company who have been very successful with their micro inverter range. They have been in Australia since 2013, and they
