An uninterruptible power supply (UPS), also known as a battery backup, provides backup power when your regular power source fails or voltage drops to an unacceptable level. A UPS allows for the safe, orderly shutdown of a computer and connected equipment. The size and design of a UPS determine how long it will supply power.

The Delta UPS business has more than a decade in designing, manufacturing and marketing UPSs globally. Delta is committed to innovating technically superior products and providing energy efficient solutions for a wide range of home, office, data center and industrial applications.
