Generac has its own integrated approach to a flexible, total power output that uses its cost-competitive modular power systems (MPS) rather than a large single generator unit or traditional methods of paralleling. There are many advantages with Generac's modular type paralleling system including redundancy, flexibility, and scalability.

The NAPA Network carries all the Elliott Generator MPSG 12 parts, oils and chemicals needed to keep it operating at top performance. Owners appreciate their vehicle looking, feeling and functioning optimally, which is why they trust in NAPA as their one-stop-shop.

The IQ Power MPS may be powered independently with an AC adapter or as part of an IQ Power system from the Control Station. When part of an IQ Power system, a pre-terminated cable with M12 connectors is used for connection to the Control Station. These cables provide power and communication for the IQ Power MPS.
