

What is Papua New Guinea's national Energy Authority?

The National Energy Authority, an independent stakeholder, is committed to fostering a sustainable and inclusive energy future for Papua New Guinea. By working closely with partners from both the public and private sectors, the Authority aims to accelerate energy development and improve the lives of citizens across the country.

Can partnerships accelerate energy development in Papua New Guinea?

Ronald Meketa, Managing Director of the National Energy Authority, has emphasized the critical need for partnerships to accelerate energy development in Papua New Guinea.

What is Papua New Guinea's pawes project?

Whilst this recent capacity-building workshop in Papua New Guinea marks a significant milestone, the PAWES project has a broader reach. It actively collaborates with Samoa, Tuvalu, the Republic of Marshall Islands, Solomon Islands, and Papua New Guinea.

How can Papua New Guinea achieve a greener path?

The development of national WtE plans took centre stage, aligning with existing solid waste management and renewable energy policies. This critical step underscores the importance of a holistic approach that integrates waste management and sustainable energy generation, steering Papua New Guinea toward a greener path.

Can the National Energy Authority replace PPL?

The National Energy Authority is not here to replace existing players like PPL, but to support renewable energy, micro-grids, and rural energy market development." Meketa urged stakeholders to prioritize energy access for the 80% of the population currently living off the grid.

What is Pacific adoption of waste-to-energy solutions (pawes)?

In an era marked by growing environmental concerns and the pressing need for sustainable energy solutions, the Pacific Community's (SPC) Pacific Adoption of Waste-to-Energy Solutions (PAWES) project is stepping up its efforts to catalyse change across the region.
