Morocco has signed an MOU with Gotion High Tech
 for the development and establishment of an
 industrial ecosystem for the production of batteries
 for electric vehicles as well as for stationary

Universit?t Chemnitz (TUC) and industrial partners.
 These printed battery cells exhibit a nominal voltage
 of 1.5 V, are typically 0.8 mm thin and weighs about
 1 g. The single cells can be chained easily therefore
 printed batteries with voltages that are ???

ENAS INDUSTRIAL BATTERIES MOROCCO

The ASSAD Group's industrial battery business now comprises three major subsidiaries: ASSAD INDUSTRIAL, GEELEC and ENAS. This structure strengthens our ability to meet the varied needs of our customers and develop innovative energy storage solutions. ASSAD INDUSTRIAL is committed to becoming the specialist in batteries and energy storage

Rabat's recent announcement that it would soon sign an agreement for the construction of a "gigafactory" to make electric vehicle (EV) batteries has placed Morocco in pole position to become a green mobility leader in the Middle East and North Africa.
