

What is Colombia's energy policy?

Since August 2022, Colombia's energy policy under President Gustavo Petro has called for increased development of renewable energy sources and reduced economic dependence on fossil fuels. The MME (Ministerio de Minas y Energí;a), formed in 1974, oversees Colombia's mining industry, mineral industry, and electricity sector.

Why does Colombia have a poor energy sector?

Lack of accountability in the Colombian energy sector allows for problematic outcomes. The gaseous nature of coal deposits in Colombia has caused a large number of occupational accidents and deaths. Poor ventilation, poor worker training, and inadequate regulation are all factors in methane-related accidents.

How much electricity does Colombia produce?

Colombia produced just over 69 TWh of electricity in 2020, fueled almost entirely by hydro power (71.89%) and fossil fuels (26.77%).
