Step 02. System. A grid-connect solar panel system is still the most suitable and viable system for most consumers. A 5kW solar system costs between \$5,000 ??? \$7,500 and is typically enough to power the average Australian household. Any excess energy is exported back to the grid where you will receive a feed-in tariff credit.

Our growth has been bolstered by the acquisitions of KPS (2009), Nova Power (2017), Contract Power (2018), Hybrid Systems (2020), CPE Switchboards and MVLV Power Solutions (2021), and Digital Intelligence and ENGV (2022). In 2019, Pacific Energy was acquired by QIC, a global investment entity owned by the Queensland Government.

They are playing an important role in WA's rapidly-growing renewable energy future and helping the McGowan Government achieve its goal to rollout 1,000 SPS by 2025." The new facility will allow for this significant capacity expansion as Hybrid Systems looks to provide Western Power with SPS systems for customers in regional and remote
