

Does png need a National Energy Authority?

PNG's National Energy Policy, 2017-2027, also proposes the establishment of a National Energy Authority 'to regulate and promote the development, dissemination of information regulation and licensing relating to all forms of energy, including non-renewable and renewable energy sources'.

Is png a good place to get electricity?

While PNG has significant untapped energy resources, the development of these resources is lagging and the country's electricity access remains extremely low, with only an estimated 13 percent of PNG's 8.6 million people having access to grid-connected electricity.

What is png's energy sector development project?

"This new project builds on the groundwork delivered through the World Bank's Energy Sector Development Project, which helped prepare PNG's National Electrification Rollout Plan, and geospatial assessments to plan optimal approaches to provide electricity to 70 percent of the country's population by the year 2030.

Does png need a reliable power provider?

"Providing affordable and reliable power to the population in PNG remains central to the PNG Government's development plans and it requires a well-functioning service provider," said Hon. William Duma, Minister State Enterprises.

Is png a LNG-producing country?

These are PNG's entry into the family of LNG-producing nations in 2014 and the announcement at APEC 2018 of the PNG Electrification Partnership, a program which has as its aim the roll-out of electricity to 70% of PNG's population by 2030.
