

Will a \$1 billion solar cell factory be built in New Mexico?

Governor Michelle Lujan Grisham (D-NM) and solar cell manufacturer Ebon Solar jointly announced that a nearly \$1 billion solar cell factory will be built in New Mexico. Ebon Solar will invest an estimated \$942 million to build an 834,000-square-foot solar cell manufacturing facility in Albuquerque's Mesa del Sol industrial development area.

Why did Ebon solar choose Albuquerque?

Ebon Solar CEO Judy Cai said: The choice of Albuquerque for our investment aligns with our commitment to sustainable innovation, and New Mexico offers abundant solar resources, favorable renewable energy policies, and a dedicated, skilled workforce.

Will New Mexico become a hub for solar cell manufacturing?

This latest announcement helps establish New Mexico as a rapidly emerging hub for solar cell manufacturing, following Maxeon Solar Technologies' announcement in August 2023 that it would build a \$1 billion solar cell and panel factory in the state - the largest in the US. Maxeon intends to break ground in the second half of 2024.

Will Ebon solar build a solar cell factory in Albuquerque?

Ebon Solar will invest an estimated \$942 million to build an 834,000-square-foot solar cell manufacturing facility in Albuquerque's Mesa del Sol industrial development area. The project will create over 900 new jobs. The Delaware-based company is aiming to develop beginning-to-end advanced manufacturing of solar cells. Ebon Solar CEO Judy Cai said:

Is New Mexico a good place to invest in solar?

New Mexico's business-friendly environment and strong commitment to renewable energy make it an attractive location for solar investments. Solar cells are made of a polysilicon-based semiconductor material. They're then fitted into the solar panel to capture and convert the sun's energy into electricity.

How much money will solar power bring to New Mexico?

ENERGY SECRETARY VISITS SOLAR MANUFACTURER IN ALBUQUERQUE

Over the next 10 years, the project is expected to bring \$4.2 billion to New Mexico. "We undertook an intensive process to assess sites across the nation to find the right home for our first U.S. manufacturing facility, which includes solar cell fabrication and panel assembly.

Going back to the Wild West comment above, solar companies go under almost daily because of shady practices and bad management. Do your research. Never get just one quote. Solar is a huge investment (we're talking \$10k-\$20k depending on your usage and home size, and even more with battery storage). It can be a top 5 expense of your life.
