

Falling costs, rising value of energy storage. The final text of the Energy Storage and Grids Pledge for COP29 recognises the essential role both play in the power sector's decarbonisation, including facilitating the increased integration of renewable energy and providing stable and secure supply of electricity.

Energy storage devices can manage the amount of power required to supply customers when need is greatest. They can also help make renewable energy???whose power output cannot be controlled by grid operators???smooth and dispatchable. Energy storage devices can also balance microgrids to achieve an appropriate match of generation and load.???
