Falling costs, rising value of energy storage. The final text of the Energy Storage and Grids Pledge for COP29 recognises the essential role both play in the power sector's decarbonisation, including facilitating the increased integration of renewable energy and providing stable and secure supply of electricity.

People around us now say, "Ok, we have to have energy storage, and it has to play a role," Mayr said. As we heard from energy storage market analyst Anna Darmani at Wood Mackenzie recently, just a couple of years ago, the energy storage market in Europe was dominated by conversation about the UK.
