Abstract: A computer-implemented method to respond to an exceptional charge event including an overdischarge in an energy storage system having a plurality of series-connected battery elements. The method includes monitoring, using the microprocessor, the energy storage system for a charge imbalance using a first detection modality; initiating a ???

Abstract: An energy storage pack includes a coolant inlet manifold, a coolant outlet manifold, and a plurality of thermal-exchange tubes extending between the coolant inlet manifold and the coolant outlet manifold to exchange heat between coolant passing through the plurality of thermal-exchange tubes and a plurality of battery cells mounted adjacent to and among the ???

More so, she will indeed earn impressive money in the future as well.
