

How do solar incentives work in Cape Coral?

Solar incentives and rebates can cut the cost of installing solar in Cape Coral by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.

Is Sunrun a good solar company in Cape Coral?

Sunrun is another big name you'll likely come across when researching solar leases in Cape Coral. Sunrun doesn't have a great reputation among customers or solar industry pros, so we don't recommend doing business with this company. What are the best solar companies for zero-down solar loans in Cape Coral?

How much does solar cost in Cape Coral?

The cost per watt makes it easier to compare prices between quotes and gives you a better idea of how fairly the system is priced. The average price of solar is about \$2.06 to \$3.1 per watt in Cape Coral, so anything in that range is a fair price. Some prices may be too good to be true.

Should you get a solar loan in Cape Coral?

Solar loans are popular among homeowners because you don't have to have the money for the installation upfront, but you get better lifetime savings than with a leased system. You also get to directly use the incentives (tax credits, rebates, etc.) available in Cape Coral, rather than a leasing company retaining them.

Where can I find EnergySage reviews?

EnergySage, Google, Reviews.io, Reddit, and Yelp can all be good places to look for reviews. Just keep in mind that reviews don't always paint the complete picture. They often focus on extreme ends of the customer experience, whether that's good or bad. Check out some user reviews from verified EnergySage customers:
