

What are enersol solar panels?

enerSol offers high-performance solar panels designed to power water pumps, providing an efficient and eco-friendly solution for agricultural, industrial, and rural areas. enerSol's off-grid series offers innovative solar energy systems, providing reliable and sustainable electricity to remote and under-served areas with limited access to power.

Who is enersol for?

enerSol caters to the commercial sector, whether they are small business owners or large corporate enterprises. enerSol offers high-performance solar panels designed to power water pumps, providing an efficient and eco-friendly solution for agricultural, industrial, and rural areas.

What is enersol high voltage?

The High Voltage PV series is under warranty for 5 years for Materials and Processing. This includes the PV module's components and installation. The enerSol high voltage series optimises solar-powered water pumping systems by offering an output range of 72V to 144V, surpassing the standard range of 36V to 72V.

What is enersol off-grid?

enerSol's off-grid series offers innovative solar energy systems, providing reliable and sustainable electricity to remote and under-served areas with limited access to power. ®; 2024 enerSol Africa. All rights reserved.

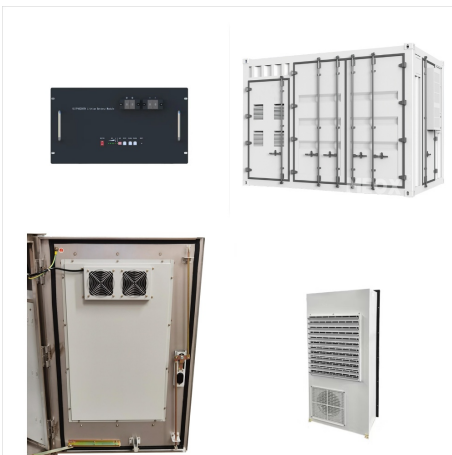

Why should you choose enersol high voltage inverters?

We engineered our storage systems as an enhancement of renewable energy sources to ensure seamless integration from the panels into your appliances. enerSol High Voltage inverters offer increased efficiency, parallel capability, high-speed MPPT algorithm, and decreased installation cost and time.

Solar on the other hand only adds nothing to the cost of electricity that is already in use to filter the pool water to circulate the water through the panels. Solar systems last much longer than either a gas heater or heat pump. Solar pool heating systems are the most cost effective and environmentally friendly option in the pool heating industry.

Use this Sizing Calculator to help you determine the number of boxes of Enersol Pool Heaters needed for your installation. Panels are approximately 1 foot wide (12.5 inches from clip to clip approximately when the panels are installed) and they come in many lengths. The most common lengths are 8 feet, 10 feet, and 12 feet.

The Enersol Pool Heaters must be positioned vertically from eave to peak with at least 6 inches to 12 inches space around the panels for plumbing. When the panels are installed, they measure 12.5 inches from clip to clip approximately. This measurement is important to maximise your roof/rack area. For example: if your roof measures 26 feet wide and 10 feet high (as shown on ???
