

Who is enertime?

Enertime also develops high-temperature heat pumps and ad hoc turbomachines. Focusing on international markets, already working in Asia, Africa and South America, Enertime is willing to bring to its industrial customers the latest technological developments to guarantee their energy supply under the best conditions adapted to local requirements.

What does enertime do?

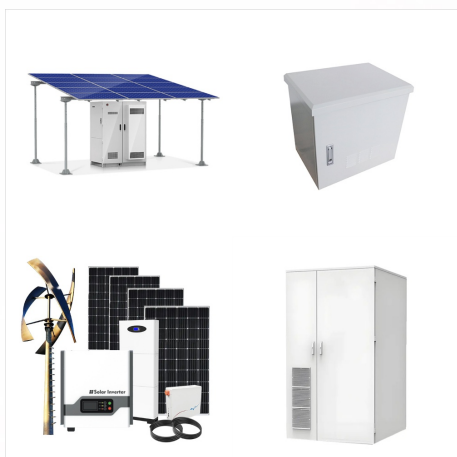

Enertime offers innovating energy solutions based on thermodynamics for energy efficiency and production of heat and power with renewable resources. Enertime designs, develops and implements Organic Rankine Cycle modules (ORC) to convert waste heat or heat produced with renewable resources into CO2-free electricity.

Where is enertime headquartered?

Enertime is headquartered in Courbevoie, near Paris. The company is represented in the following countries and territories: La Réunion island; Representative: Mr. Jérôme Tarbes; New-Caledonia with AE2P Company Enertime has 5 employees at their 1 location and EUR2 m in annual revenue in FY 2022.

How many employees does enertime have?

Enertime has 5 employees at their 1 location and EUR2 m in annual revenue in FY 2022. See insights on Enertime including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft.

Enertime is a listed French industrial SME with a mission to fight global warming by developing innovative solutions around thermodynamic science for CO2-free energy production, industrial energy efficiency and circular economy. Enertime offers unique competitive turn-key solutions for industrial-scale distributed CO2-free

Enertime est une PME industrielle française cotée en Bourse depuis 2016. Nous accordons une grande valeur à la lutte contre le changement climatique et la décarbonisation de l'industrie. Avec notre équipe diverse et qualifiée, comprenant des ingénieurs et des techniciens du monde entier nous intervenons aussi pour la réindustrialisation.

Enertime is the only actor in the world offering ORC machines and a portfolio of other technologies in the field of thermodynamics applied to the energy transition. For ORC Technology it is one of the four major global players and the only French Company mastering this technology of high-power machines (1 MW and more).

Clean Energy Harvesting Enertime est le spécialiste mondial de la valorisation d'énergie fatale dans l'industrie. Nous mettons au point pour cela des machines thermodynamiques de forte puissance comme les cycles organiques de Rankine (ORC), pompes à chaleur industrielles (PAC) et turbines de détente de gaz naturel (turboexpanders).

Enertime is a listed French industrial SME with a mission to fight global warming by developing innovative solutions around thermodynamic science for CO2-free energy production, industrial ???

ENERTIME's ORC machines convert heat into electricity, while heat pumps produce high-temperature heat with lower-temperature heat and electricity. In the ORC market, ENERTIME is one of the four major players worldwide and the only French company to master this high-power machine technology (1 MW and more).
