Replaced the high and low pressure fuel pressure sensors with no change, spark plugs, new low pressure fuel pump in the tank and solenoid.

I have a 2018 Atlas SEL Premium, with the 3.6L FSI V6. It comes with auto start-stop, like many cars these days. "System/power needs": See this frequently. I have TAOS with the same problems. EPC sign goes on and the engine loses power. Also, the auto stop-start goes on and off itself. Immediately after EPC sign goes on, and the engine stops, I must restart it by turnig off and than on!? Manually, of course! I was at VW service and was told that I should drive longer and the problem would be solved.
