

What is Enginuity power systems?

Enginuity Power Systems is producing a new generation of patented ultra-high-efficiency engines. These engines are ideal for both manufacturers and consumers across an almost endless range of applications.

What is Enginuity engine technology?

Enginuity's proprietary, low emission engine technology enables combined heat and power and other advanced generation products for home, commercial and military use. Enginuity is a leading innovator in high-efficient micro-generation through its patented efficient engine technology.

Who is Enginuity power solutions?

Enginuity Power Solutions is dedicated to delivering energy-efficient solutions tailored to modern ESG goals. We specialise in designing power systems that reduce costs and enhance sustainability, ensuring your business thrives without compromising on productivity.

Where are Enginuity engines produced?

Enginuity's engines are produced by its wholly owned engine production subsidiary, Katech Engineering, in Detroit MI. They are currently developing and testing power generation systems ranging from the E|ONE's 8 kW unit all the way up to a 250-kW system for advanced Micro-grid applications.

Does Enginuity have a RIHGS system?

Enginuity's proposed RIHGS System, based on the E|ONE platform, recently won a U.S. Army award to develop a cutting-edge hybrid portable power system. For larger applications requiring more power, Enginuity's E|TWO product line can supply energy for larger homes with pools and the light commercial marketplace.

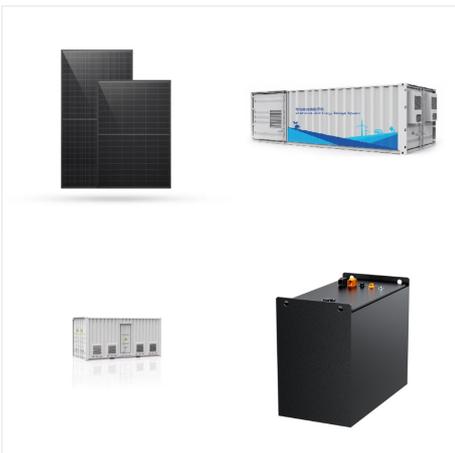

Who is Enginuity Inc?

Engineering Halifax | Product Design | Enginuity Inc. | We are a Halifax engineering firm specializing in automation, design engineering & product design. We transform ideas into winning products. | Enginuity Inc

Independent Commercial Generation System. The Enginuity 20kW System is highly customizable, utilizing modular power and thermal storage components resulting in a wide range of affordable custom configurations. The Enginuity 20kW system is purpose-built to deliver cleaner more resilient energy for applications in the light commercial markets.

The Enginuity 8kW System is being tested this year in a research home by the United States Department of Energy, part of our overall acceleration in development. In today's growing green environment, it's a product primed to make an impact.

Enginuity Power Systems is an award-winning technology company revolutionizing the distributed energy generation market. Committed to advancing energy efficiency and sustainability, Enginuity is inventing new technologies for homes, commercial businesses, and military applications that enable private power generation for cleaner energy, resiliency, and energy cost savings. Enginuity Power Systems is an award-winning technology company revolutionizing the distributed energy generation market. Committed to advancing energy efficiency and sustainability, Enginuity is inventing new technologies for homes, commercial businesses, and military applications that enable private power generation for higher efficiency

Alexandria, VA ??? September 12, 2024 ???  
Enginuity Power Systems (Enginuity) is pleased to announce that its brand-new portable power stations are now for purchase on Walmart . For home emergency preparedness, a sustainable power solution and for flexibility of off-grid living, Enginuity realizes the importance of having powered devices

# ENGINUITY POWER SYSTEMS LOGO

Enginuity will soon launch a \$4 million DoD/Army program for advanced development of a 2-5kW hybrid load following (FTL) genset, that looks to consolidate three legacy systems into a single system

Learn more about our energy solutions, including Hanover Research findings about the size of the potential market for Combined Heat and Power Systems (in the United States alone, it is estimated at \$177 billion), click this image below for the NextRise 2024 one-sheet that will be distributed at the event:

Enginuity Power Systems has developed a new generator engine. Designed for individual homes and small businesses, the quiet, ultra-efficient heat and power generation system has a 500cc capacity and is fully capable of developing 8.2kW. Combining inwardly-opposed-piston efficiency with a four-stroke cycle, the engine

# ENGINUITY POWER SYSTEMS LOGO

About Enginuity Power Systems: Enginuity Power Systems has invented the next generation of engine and generator technology with its patented four-stroke inwardly opposed piston engine. The dynamically scalable engine is ultra quiet, lightweight, 25%-30% more fuel and thermally efficient than conventional technology, and multi-fuel capable.

Enginuity Power Systems" Personal Power Pack (P|3) is a durable and lightweight portable generator designed to be easily carried by a single individual. This hybrid diesel / electric generator weighs between 25 to 30 pounds with the completion of the next P3 prototype, it will produce between 1.5 to 4 kilowatts of power.
