Enix Power Solutions are surrounded by specialists in all technologies who enable us to produce reliable, efficient products based on our customers' expectations. Not only do we supply our own range of NX??? batteries, we also work with world leading battery manufacturers. Learn more about our different partners and the solutions they provide

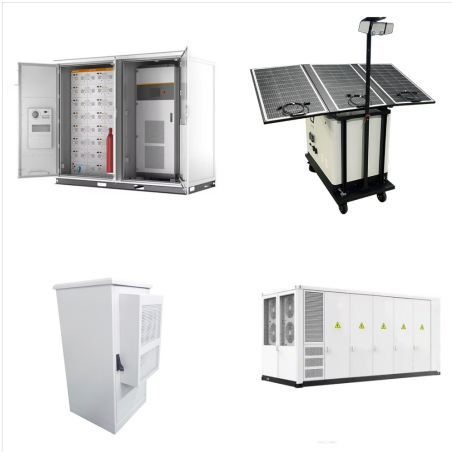

Lithium Iron Phosphate batteries first appeared in the early 2000's and are increasingly used in robotics and energy storage. Lithium Iron Phosphate (LiFePO₄) batteries have a nominal voltage of 3.2V and are an excellent solution for applications requiring a lightweight, high capacity battery with a long lifespan and stability at high temperatures.
