Enlight Energy Solutions (Pty) Ltd is a start-up company founded in April 2016 with its primary focus being the design, development and manufacture of pre-paid electricity meters. The group that founded the company has the necessary diverse core competencies including but not limited to the following:

Enlight describes itself as a vertical integration company, capable of operating in all four areas of the energy production chain so as to reduce licensing timeframes and generate higher returns on investments. The first of the four areas is the initiation stage, which involves locating suitable land or rooftops and entering into agreements with the owners; the second is the development and

The Orvim Reservoir Project in the Golan Heights was built in partnership with Golan Water (Mey Golan). The floating solar system, one of the first in Israel, was designed to cover only part of the reservoir, accommodating environmental requirements for all users of the reservoir water, including birds, and herds of cattle.

Enlight began as a developer of rooftop solar projects but quickly leveraged our expertise to expand into utility-scale projects. It wasn't long before we set our sights on the global market and established a presence in three key regions: ???
