

Eon, one of the "Big Six" UK energy providers, is to shift all of its residential customers to 100 per cent renewable electricity, becoming the largest utility yet to move to green supply.

Its technology platform connects all parts of the energy supply chain from renewable energy generation to customer service and billing, unlocking efficiencies in customer service and automation so far unseen in the energy retail sector. E.ON Next delivers 100% renewable electricity* to homes and to small and medium-sized businesses that

As we transition to Net Zero, we want to inspire more young people to develop the knowledge and skills that will equip them to build a brighter future for themselves and make a difference in the world. Our educational resources, developed in partnership with ???

To sell a tariff labelled as 100% renewable electricity, an energy firm must buy enough certificates for renewable energy to match what customers on the tariff use over a year. If a company has bought enough certificates to match all of its customers' electricity use (on all tariffs), it will be able to say that its overall fuel mix is 100%

E.ON is committed to supporting these objectives. It has shown dedication by investing ?9 billion into renewable energy. It matches domestic and commercial energy with renewable energy sources. This includes wind, biomass and solar power. E.ON's Next reviews make one thing clear: customers love the fact that this supplier cares about

The new E.ON is an international energy company focused on smart grids and customer solutions to drive the energy transition in Europe. across all age groups and educational levels believe that the rising costs of promoting renewable energies are jeopardising acceptance of the energy transition. Twelve e-trucks, twelve teams, 300 kilometers

1. Next Drive electricity backed by 100% renewable sources, E.ON's renewable generation assets, agreements with UK generators and the purchase of renewable electricity certificates.
