

Why is my equalizer not working?

One of the most common issues with Equalizer Systems is that the control panel will not power up. First, you want to check if the power indicator light is turning on when the power button is pressed. If not, then you know there is a power supply issue, or the harness that connects the keypad to the controller is defective.

What are the most common troubleshooting items for equalizer systems?

Let's dive into the most common troubleshooting items for Equalizer Systems! One of the most common issues with Equalizer Systems is that the control panel will not power up. First, you want to check if the power indicator light is turning on when the power button is pressed.

Who should use the equalizer systems auto-level system manual?

equalizersystems.com This manual is intended to be used by technicians installing Equalizer Systems Auto-Level systems. It is assumed that the reader is familiar with hydraulic, mechanical, and electrical systems; in addition to workplace safety. Warning: Modification of any factory-supplied item may result in the denial of all warranty claims.

What should I know about equalizer systems technical support?

Call Equalizer Systems Technical Support prior to any modifications. Danger: With any hydraulic application, holding position on a cylinder must be done with safety in mind. Failure in the system may cause the jack(s) to retract or extend suddenly.

How do I troubleshoot an RV Equalizer system?

Troubleshooting for Equalizer Systems include: It's best to go through these items one by one to troubleshoot. To do this you will need to check your RV battery to confirm the voltage, trace and repair faulty connections, replace the motor if bad, and lastly call Equalizer Systems directly for steps on how to fix a defective keypad.

How do I set my EQ system auto level?

First, ensure your coach is level by manually leveling and using a level to verify. Then hold down the "Auto Level" button and push the power button at the same time. Hold down the "Auto Level" for about five beeps

EQUALIZER LEVELING SYSTEM NO POWER

and then release. Your new auto-level will now be set! EQ Systems are durable, reliable, and accurate.

I had a leveling problem with my SENECA, 2016. Front jacks went all the way down, rear jacks went half way down and system shut off. Jacks wouldn't go up or down. After troubleshooting the system myself (checking for blown fuse) I found a bad ground connection, and a poor crimp connection on the relay that runs the pump.
