

covering the entire value chain from design to operation, Equans is launching Equans Solar & Storage. Equans Solar & Storage brings together 1,500 employees from the Equans Group, specialised in the latest technologies that combine solar energy production and storage systems to ensure the highest yields and grid balancing.

To meet the needs for large-scale, integrated, and high-performance solar and storage solutions, covering the entire value chain from design to operation, Equans is launching Equans Solar & Storage.

With our deep technical experience and 15-year track record in solar and storage, we specialize in every aspect of the value chain, from design and engineering to installation, operation, and maintenance of solar plants, whether with or without energy storage and grid connection. We are a reliable Engineering Procurement Construction partner

We design and deliver turnkey utility scale solar PV farms of the highest quality, which consistently outperform competition. We use tier-1 equipment exclusively, and provide best-in-class maintenance to the assets we build; guaranteeing a?

Equans Solar & Storage The one-stop partner for scaled, integrated and performant solutions for solar and storage projects. Serving energy transition and low carbon world by empowering the deployment and integration of solar and a?

Bouygues Energies & Services (Bouygues E& S), a company of Equans, the global leader in energy, digital and industrial transitions, has secured a contract for the design, build, operation a?

, Equans has delivered four solar sites for them, with a further nine projects for large-scale solar farms in progress, and many nearing energisation. Together these projects will provide a total intended capacity of up to a?|

Equans, through its new brand Equans Solar & Storage has secured a contract with global renewable energy company, Low Carbon, for the design and build of six new large scale UK solar farms - four of which will include battery energy storage solutions (BESS).

This is the first project in Belgium to make large-scale use of floating solar panels. With a capacity of 7.04 MWp, the solar farm is estimated to generate a total of 6,300 MWh of electricity per a?|

We install roof mounted Solar PV, helping our clients to meet their demand for electricity generated onsite from a renewable source. We also provide measurement and verification using smart metering and digital data, enabling you to monitor the efficiency of energy generation.

Through its subsidiary, Equans Solar & Storage, Equans will be responsible for designing and building six new large-scale solar farms in the UK, with four of them incorporating battery energy storage solutions (BESS). This strategic partnership aims to contribute to the UK's clean energy transition and support the country's net-zero ambitions.

We design and deliver turnkey utility scale solar PV farms of the highest quality, which consistently outperform competition. We use tier-1 equipment exclusively, and provide best-in-class maintenance to the assets we build; guaranteeing long term project performance.

Equans Solar & Storage The one-stop partner for scaled, integrated and performant solutions for solar and storage projects. Serving energy transition and low carbon world by empowering the deployment and integration of solar and storage solutions.
