

Does nuclear Shields manufacture lead-lined storage cabinets?

Nuclear Shields manufactures lead-lined storage cabinets and lead-lined containers for radioactive sources. These cabinets can be used for various applications and can be custom made to your dimensions, amount of drawers and more. Storage of radioactive materials requires the use of radiation shielding.

What is a shielded radioactive source storage cabinet?

This shielded radioactive source storage cabinet has a small footprint, making it suitable for facilities that have a small space for storage of their industrial radiography gamma projectors. Our shielded cabinet is designed to be easily installed in small spaces by using smart techniques and handling equipment.

What are the best storage boxes for radioactive waste & gamma emitting isotopes?

Ideal solution for short-term storage of radioactive waste or radioisotopes Maxi 14 X 28 X 16.5cm storage boxes ideal for protection against beta radiation. Cleaver uniquely designed scientific cabinets provide a convenient area to carry out work with beta and gamma emitting isotopes with complete all round protection.

What is industrial radiography Gamma Projector storage cabinet?

The industrial radiography source projector storage cabinet is standard shielded with 25 mm of lead shielding. The dimensions of the compartments can be customized to make the shielded source storage cabinet fit inside a small area while still having enough storage capacity to store the industrial radiography gamma projectors.

How do you store radioactive materials?

Storage of radioactive materials requires the use of radiation shielding. The radioactivity can be shielded by placing the radioactive materials into a shielded containment such as a lead shielded cabinet, lead shielded safe or a lead shielded container.

How long does it take to install a shielded radioactive source storage cabinet?

By using a vacuum lifter and a roundsling, compact lead shielding plates can be easily placed into position. Installing the shielded radioactive source storage cabinet will only take one day with the correct handling equipment. Even in small spaces.
