La isla Bouvet (en noruego: Bouvetøya) es una isla subantártica, volcánica, casi completamente cubierta por glaciares y deshabitada. [2] Se encuentra localizada en el océano Atlántico Sur, unos 1750 km al norte de la Antártida, 1900 km al este de las islas Sandwich del Sur y 2520 km al suroeste del cabo de Buena Esperanza (en Sudáfrica), por lo que se la considera la isla ???

BOUVET ISLAND, a territory of NORWAY, is known as one of the peri-Antarctic islands, small uninhabited rocks and volcanic islands that circle the frozen continent. It was discovered by Jean-Baptiste Charles Bouvet de Lozier, a lieutenant in the French East Indies Company, on New Year's Day, 1739, but not found again until nearly a century later.
